PROFILE

Operations leader who builds and runs AI systems, not slide decks about them. As acting COO of a US consumer biotech startup I designed the go-to-market, closed the company's key fulfillment partnership, and then automated the marketing and research operation itself: a fleet of 15 scheduled AI agents that produces the company's daily content, ads, competitor intelligence and reporting, run by one person. Behind that sits 20 years of real P&L: Big 4 tax (EY), two businesses built and run as founder and franchise owner, and eight years leading export sales and marketing for a specialty chemicals company across India, the UK, Ireland and the Netherlands.

Proof, not promises: my agent fleet ships 10 finished ad creatives, a publish-ready SEO article, competitor and trend intelligence, and long-form scripts every day, with an automated QC review pass before anything ships, replacing the output of a five-person content team. Full walkthrough at the portfolio link above. I can map your most repetitive workflows and automate them the same way, with agents or in n8n.

WORK HISTORY

Chief Operating Officer (Acting)

Feb 2026 to Present

MySpawn · US consumer biotech / DNA-preservation startup (remote)

- Built and operate a **fleet of 15 autonomous AI agents** (Claude Code, ChatGPT, Grok) producing, on a daily schedule: **10 finished image ad creatives, one publish-ready SEO article, competitor monitoring, trend research, short-form scripts and long-form content**, plus weekly newsletter, SEO rank tracking and partner prospecting, cutting content-operations cost to near zero.
- Designed the fleet's **quality-control gate**: an automated adversarial review (fact-sourcing, claim checks, audience-persona scoring, visual verification) that every asset passes before shipping.
- Deployed **production n8n automations**, wiring GitHub, Gmail, Google Sheets and Drive APIs with OAuth and webhook credentials myself: a live webhook-triggered creative-delivery pipeline (GitHub to Google Drive) and an AI-personalized outbound email system with automated follow-ups and reply detection.
- Ran **outbound business development end to end: prospected 200+ companies** with structured follow-ups, arranged partner meetings, and **closed the company's core fulfillment partnership with an accredited US biorepository**.
- Own **go-to-market strategy, pricing, and campaign planning** across Meta, TikTok, YouTube and X; **designed and shipped the company websites, landing pages and full brand asset system** hands-on with Claude Code.
- Built the operating backbone: **SOPs, legal-review preparation, hiring, and daily operations** for a distributed team.

Head of Sales & Marketing

2018 to 2026

Asta Bio Chemicals Pvt Ltd · India & London, UK

- Owned sales and marketing for a specialty chemicals company selling across **India, the UK, Ireland and the Netherlands**; **grew overseas sales 40%** by opening new export markets and building key accounts.
- Negotiated contracts and pricing with international buyers and distributors; managed long-cycle B2B relationships and built the marketing strategy for domestic and export markets.

Franchise Owner & Manager

2012 to 2018

Mocha Cafe (Impresario Group) · Bangalore

- Owned full P&L, payroll and compliance for an 18-staff city-centre cafe; **cut waste 22%, lifted margins 8%**; ranked among top Mocha outlets in South India.

Founder & Director

2007 to 2012

DGR Properties · Bangalore

- Built a property-management company from **2 to 12 buildings**; delivered renovation projects up to ₹80 lakh; ran all accounts, budgets and vendor payments.

Tax Associate

2005 to 2007

Ernst & Young (EY) · Hyderabad

- Corporate tax returns, TDS and compliance for manufacturing and IT clients; supported clients through Income Tax assessments.
